

## GUARDIAN 001 TABLE CLOCK IR FULL HD CAMERA

Full HD  
1080

**Do you need a camera that allows you to record and view remotely from your smartphone, discreetly and in conditions of little or no ambient lighting?**

**The EuroSpy GUARDIAN 001 is the system you are looking for. The built-in infrared leds will allow you to see at a distance of 5 meters in complete darkness.**

The EuroSpy GUARDIAN 001 is an elegant table clock that shows time using a large led display and incorporates a FULLHD resolution hidden camera system with memory card recording.

The EuroSpy GUARDIAN 001 is WIFI, so you can remotely view, from your smartphone, both what happens in real time and the recordings you have stored on the memory card.

Other features include an ambient microphone, a motion detection system (you choose whether you want to record permanently, by schedule or by motion detection), continuous looping (you decide if you want to stop recording when you fill the Card or re-recording over older recordings) and can operate either autonomously by means of its rechargeable battery (3-4 hours) or permanently connected to the power.

You from the orders through the APP and the EuroSpy GUARDIAN 001 will do the surveillance work you require.
