

BLACKBOX 001 BLACK BOX WITH MOTORIZED LENS CAMERA

The EuroSpy BLACKBOX 001 is a model Hidden FullHD camera within the range of Black Box (black boxes) designed to be placed anywhere you want to control and thanks to its long battery life (up to 10 hours), allows us Record in places where it is not possible to connect it to the electric current.

In addition, the new motorized camera controllable from the APP of Smartphone will allow you to orient it to your taste and cover about 220°.

The EuroSpy BLACKBOX 001 is WIFI, so that you can remotely view, from your smartphone, both what happens in real time and the recordings you have stored on the memory card.

Other features include an ambient microphone, a motion detection system (you choose whether you want to record permanently, by schedule or by motion detection), continuous looping (you decide if you want to stop recording when you fill the Card or rewriting over older recordings) and can operate either autonomously by means of its rechargeable battery (8-10 hours) or permanently connected to the power.

You order through the APP and the EuroSpy BLACKBOX 001 will do the surveillance work you require.
