

## OBSERVER 003 CAR REMOTE CONTROL FULLHD CAMERA

**The Observer 003 is a discrete and robust recording device hidden in a conventional vehicle's door remote control that can be carried anywhere.**

You can make high-quality video recordings (fullHD) with sound, take high-resolution pictures (12 megapixels) or make just voice recordings. The way to work with the Observer 003 is very simple. The battery's autonomy, full charged, allows you to make video recordings of more than one hour.

The Observer 003 incorporates two infrared led light that allows to make short distance recordings in completely dark places.

Also, it incorporates a function of movement detection, so for example, if you leave it on top of a table, it will record only when it detects someone passing by.

Video resolution	Max. 1920 x 1080
Photo resolution	12 Megapixel
Frames per second	Max 30fps
Memory type	microSDHC Class 10
Max capacity of memory	32Gb
Visualization software	VLC Player / SM Player
Consumption	500mA / 5V
Size of files	1 minute / about 20Mb
Battery work time	About 1 hour
Charging time	2 – 3 hours
