

USER MANUAL

EUROSPY
AURAL 004

INTRODUCTION

The Eurospy Aural 004 is a recorder of high quality sound and long battery working time (30 hours at full charge) in a miniature size device.

It has an 8GB memory that allows you to store up to 95 hours of recording. In addition, you can play the recordings not only on a computer but you can listen directly from the recorder through headphones.

Charging the battery

With the switch in the OFF position, connect the recorder, using the USB plug included, to your computer, to the USB port on your computer or to an external charger. The red LED remains blinking while charging.

Record

Turn the power switch to ON. The red led light comes on for a few seconds, then flashes and goes out. Now the device is recording.

As you can see, the recorder does not emit any light when it is in recording mode, which makes it more discreet.

End recording

When you want to stop / turn off the recorder, turn the power switch to OFF. The red led light comes on for one second and goes out. Now it's completely off.

Listening the recordings

You can listen to recordings in two ways:

1) With your computer, connecting the recorder to the USB port using the USB plug that is included. Just connect it to your PC / laptop in the OFF position, and a window will appear on your computer with the folder where you have all the recordings (similar like when you connect an external flash drive to your computer)

2) Directly from the recorder using headphones. To do this, first connect the headphones to the recorder and then slide the switch to the ON position and it will start playing the first recorded voice file.

Use the + and - buttons, clicking on them to move from one file to another.

To increase and decrease the volume, press and hold + or -.

Erase stored recordings

To erase files stored in the voice recorder, connect it to your PC / Laptop via the USB plug with the switch in OFF position. A window will open in your computer screen with all the files stored. Now you can delete / cut / copy the files as you would normally do with the files from an external USB memory (Pen drive).

Features

| | |
|-------------------|---------------------|
| Record quality | 192kbps |
| Recording format | WAV |
| Memory type | 8Gb Build-in |
| Memory autonomy | 95h approx. |
| Battery | 200mAh |
| Size in cm | 5.6x2x0.8 |
| Battery work time | About 30 hours |
